Building Our Community

- Inner West Council will invest more than **$500 million** over the next 15 years to deliver local infrastructure our growing community needs.
- We want to hear from you about how this funding should be invested in our local infrastructure to help shape the future of the Inner West.
- We also want to hear about what State Infrastructure projects we should be advocating for in your area.
- Provide feedback at yoursay.innerwest.nsw.gov.au/building-our-community or scan the QR code
- Closes **Sunday 1 March 2026**

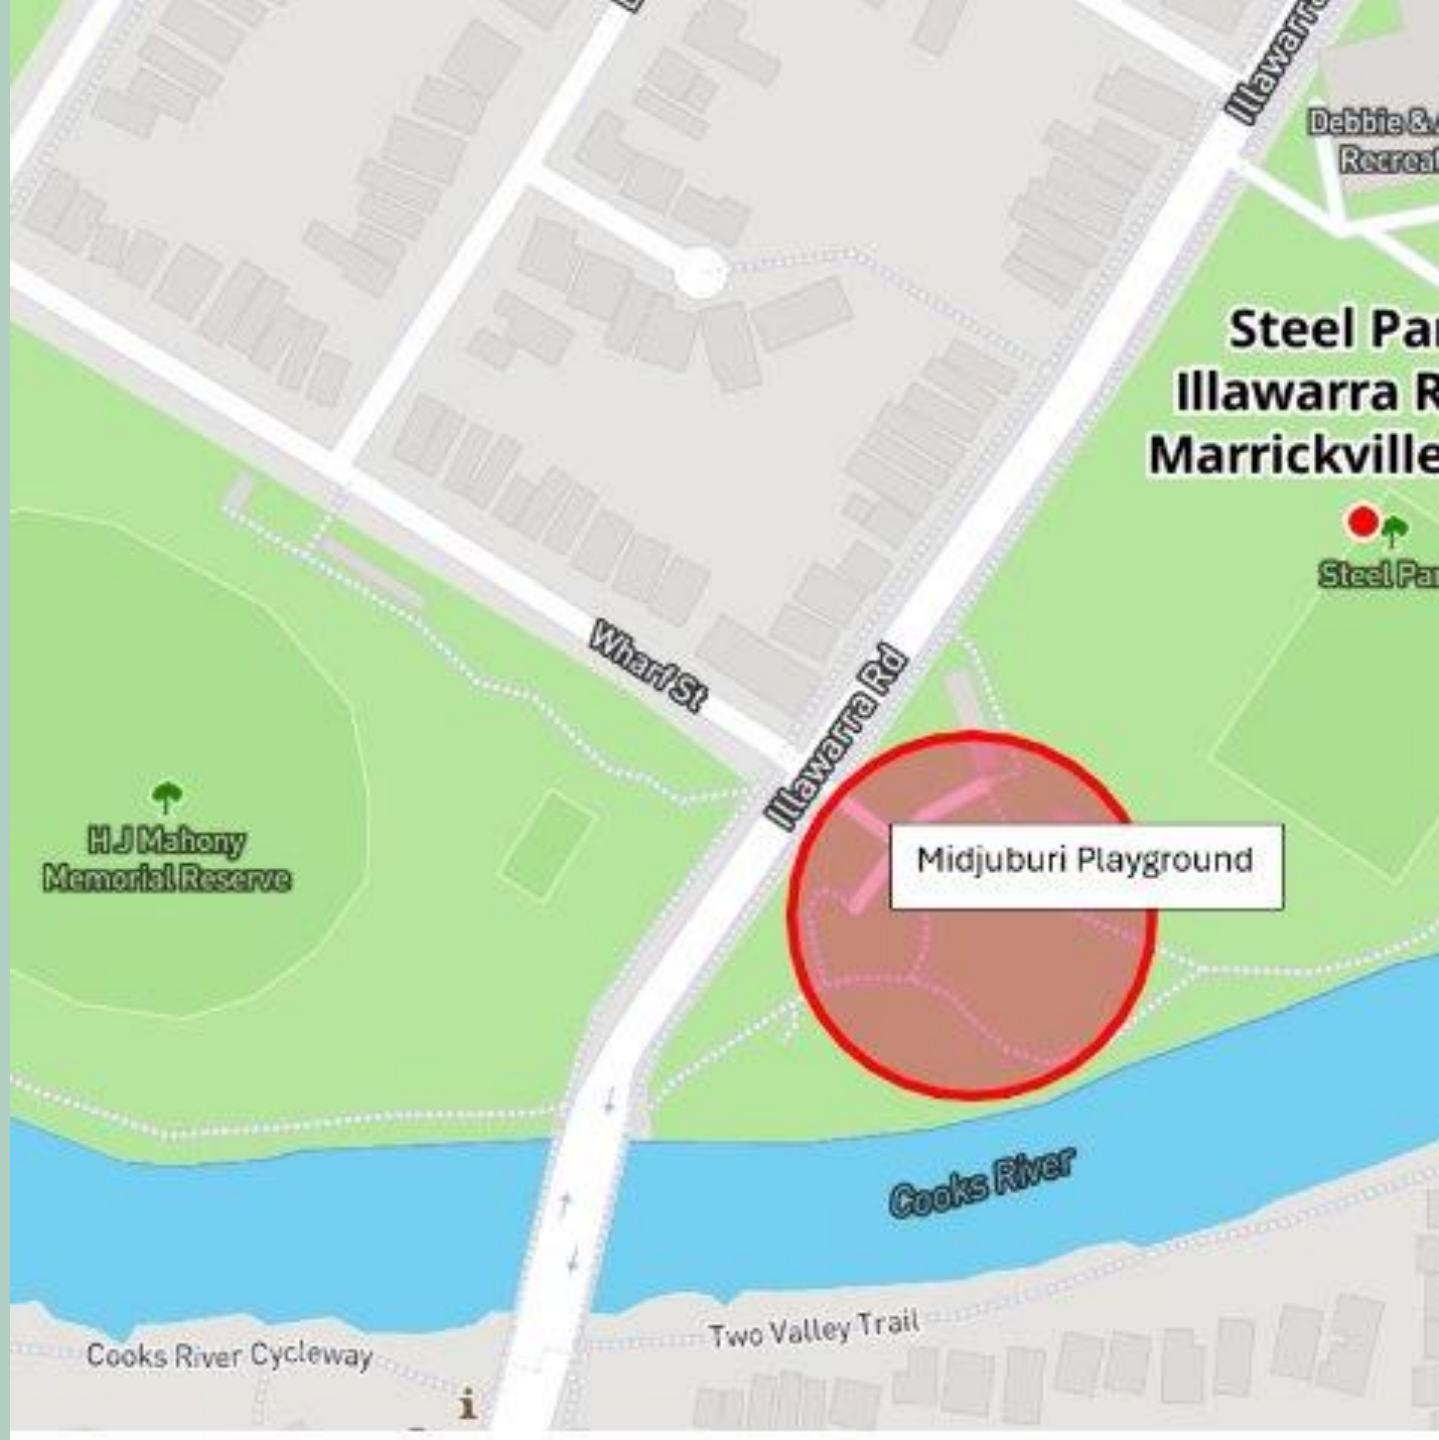
Improving the inclusive playspace - Midjuburi Playground in Steel Park

INNER WEST



Legend

1. Existing water play
2. Double flying fox
3. Tall swings
4. Accessible swings
5. Imaginative play
6. Toddler Play area
7. Rotating swing
8. Diverse & inclusive play structure: elevated platform with slides, climbing other play elements
9. Minor enhancements to nature play
10. Minor enhancements to sensory garden
11. Entry gate
12. Retained seating and picnic space
13. Additional seating at picnic shelter
14. New seating space
15. Retained lawn area / picnic area
16. Perimeter fence and planting
17. New shade tree planting
18. Amenities building to be upgraded (separate project)
19. New paths
20. Perimeter path around play space

DIVERSE & INCLUSIVE PLAY STRUCTURE

A diverse and inclusive play structure has been included in the design which provides a ramp to a range of play equipment in the playspace including climbing elements and slides for toddlers through to older children. Incporporated underneath the play structure will be range of imaginative play including talking tubes, sound play, small seats and tables, tunnels, shop fronts and small cubicle seating for children to play. The structure is designed to provide an 'in the round' experience where everyone comes together to play, participate, watch and socialise in the one space within the playground. The structure will incorporate a shade structure over the main path

This sketch illustrates the intent for the structure and will be further refined based on community feedback and further design development.
