Have your say

Marrickville Road East cycle path concept design

Dear community member,

Inner West Council is updating the cycle path on Marrickville Road East, between Gleeson Avenue (Sydenham Station) and Meeks Road.

This is part of the Southwest Metro Active Transport Link project, connecting Sydenham Station to Dulwich Hill, and will be delivered through the Sydney Metro Sydenham to Bankstown upgrade.

The cycleway will link with the existing St Peters cycle route (Princes Highway to Mary Street) to Sydenham Station. It is also slated to connect with the proposed cycle way upgrade from Darley Road, Newtown to Sydenham Station, as outlined in the Marrickville Masterplan.

We have developed the concept design for the Marrickville Road East cycle path and want to hear your feedback.

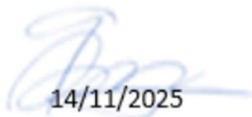

Join us in person to discuss the concept design:

- **Date:** Monday 1 December, 10am – 2pm and Thursday 4 December, 4 - 7pm
- **Location:** In person on the footpath at 132 Marrickville Road, opposite Sydney Street

If you can't make the in-person sessions, please see the reverse of this page for more information on how you can have your say online.

Here you will also find the contact details for the responsible Council Officer and a copy of the concept design.

Sincerely,

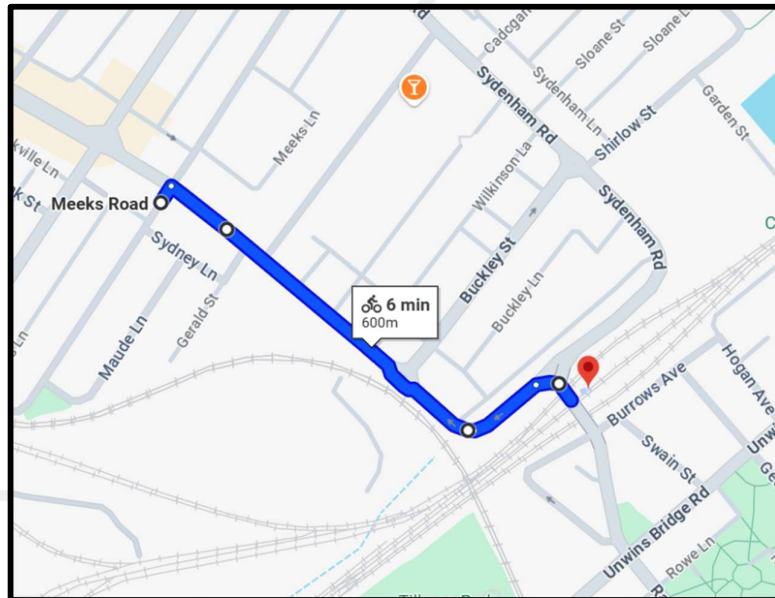

14/11/2025

Roads Manager (Acting)
Predrag Gudelj
